### **Approval of May 17, 2021, Meeting Minutes**

Motion made by Mr. Knowles to accept the minutes from the May 17, 2021, meeting. Mr. Cleveland seconded the motion. Motion passed.

### **R 408.17415(6)**

Discussion held by the committee. Mr. Glotzbach and Mr. Cleveland would like the date to be concurrent with the January 1, 2025, date to match the other dates of the standard. Mr. Knowles questioned if they need to put in a controlled process exhaust ventilation system for a temporary space. If the location is not modified, then it would not be required in a temporary location. The rule would apply to any additions of new bays, living quarters, etc., if the addition is 50% of total square footage of what you currently have already.

Rule modified to read:

Effective January 1, 2025, all new construction or significantly remodeled facilities (50% or more area) that house fire apparatus shall install a controlled process exhaust ventilation system that will effectively control exhaust emissions created by the fire apparatus. If a general mechanical exhaust ventilation system is utilized, then a mechanical air supply system shall be provided if its absence will result in building negative pressures sufficient to cause back drafting of vents from fuel-fired equipment.

Mr. Cleveland made a motion to accept the proposed language. Mr. Glotzbach seconded the motion. Motion passed.

### **Survey Results**

Mr. Cleveland stated he took the survey and that it was clear and easy to complete.

The language that will be sent along with the survey was shared with the committee for review. A few modifications were made.

Three weeks was ample time for the committee to take the survey. It was suggested to not give more time, as most will probably answer within the first few days. After the survey is sent to the Fire Departments, a reminder email will be sent each week to encourage completing and submitting.

### **Agency Instruction**

The internal staff are still working on the instruction. It is anticipated that it will be done by time the survey is complete and results compiled.

### **Next Meeting**

Monday, August 30, 2021, at 9:00 a.m. Mr. Barnes was able to secure a room at the Delta Twp. Fire Department, 811 N. Canal Rd, Lansing, MI 48917. Parking in back.

### **Adjournment**

Meeting adjourned at 10:07 a.m.
